

Lyra— Design Group Italia, 1994

Lyra is a family of stools of different heights, created for Magis by Design Group Italia, one of Italy's most significant industrial design firms. Its chromed frame in tapered steel tube features harmonious arched lines and a simple, comfortable seat in curved beech plywood.

An ideal complement for many different uses and settings, from domestic to contract.

### Design Group Italia

Design Group Italia is an example of Italian professional eclecticism with an international vocation, which has accomplished highly successful projects for a large number of customers around the world.

Design Group Italia's professional vision is sensitive to the demands of the market and of industrial production processes, combining that receptiveness with an acute awareness of the possibilities and fruits offered by the latest technological advances of the moment.

The ultimate objective is always to make a product that is truly innovative yet simple to produce, pleasant and easy to use, and a market winner.
