

Almost twenty years after the launch of the ladder Step, Magis has developed the design for a new stepladder, seeking to create an object that meets all the different safety standards for this product category (Flò is actually TÜV certified): furthermore, the design includes a handrail that extends to above knee-height when the person is standing on the top step.

compact and easy to store.

Flò is a light, practical and extremely sturdy folding stepladder, with an aluminium frame and ABS steps. It is opened and closed by simply raising or lowering the cross-bar on the safety rail, which disappears entirely when the ladder is closed, making it neat,

Designer

Marcello Ziliani

Marcello Ziliani graduated in architecture at Milan's Politecnico university with Achille Castiglioni as his supervisor (and unparalleled teacher).

After three years abroad, he returned to Italy and devoted himself mainly to developing design projects in the fields of furniture, accessories, lighting, bathrooms, offices, objects and early childhood, as well as working in exhibitions, theatrical choreography, art direction, design coordination, graphics and communication. He doesn't like absolutism and indestructible certainties; he loves to look at things with ever-new eyes, so as to tune into them, he

prefers to speak softly and, above all, to listen.

He believes that any design project is essentially a wish, a dream of flight.
