

Tide – design Zaha Hadid, 2011

The design of Tide bookcase is a study in geometry and mathematics, and defines optimal shapes and forms, created to offer the greatest possible surface area from all sides. The result is a system of modular elements with the scope to form innumerable different compositions, from the very small to the large or even enormous. It is made of glossy moulded ABS, in three universal colours – white, red and black – that can be freely mixed and matched. Tide can create the widest range of shelving solutions for books or for any other requirements involving the display and organization of objects, in

domestic spaces, showrooms or commercial settings alike.

Zaha Hadid

Zaha Hadid is the founder of Zaha Hadid Architects, and is internationally renowned for both her theoretical and academic work. Each of her dynamic and innovative projects builds on over thirty years of revolutionary exploration and research in the interrelated fields of urbanism, architecture and design. Hadid's outstanding contribution to the architectural profession continues to be acknowledged by the most world's most respected institutions. TIME magazine included her in their 2010 list of the '100 Most Influential People in the World' in the Thinkers category.
