

Little Big table

design **BIG-GAME** / 2018

After Little Big chair, the Little Big collection has grown with another product, a table, to create a perfect combination with.

Like Little Big chair, the table also has a smart system, allowing its height to be adapted as kids grow: along with the chair, it maintains its ergonomic position at a range of heights.

The sturdy HPL top makes the table perfect for children's activities, and its sturdy wooden structure is suitable for both homes and in education.

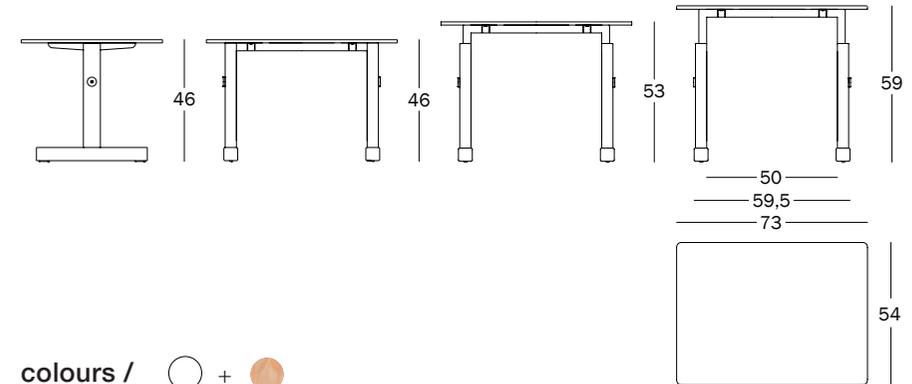

materials /

legs in solid ash, natural. Frame in steel painted in polyester powder. Desk top in HPL. Adjustable in height.
