

ALL-ROUND

design **From Industrial Design** / 2024

The concept and shape of the new steel sheet table designed by From Industrial Design for Magis is reflected in its name: ALL-ROUND.

Created to suit countless contexts and to complement any kind of chair, ALL-ROUND embodies the ability to transcend time and trends in a neutral and versatile aesthetic, with “a unifying and modern idea of community”, as designers Cesare Bizzotto and Tobias Nitsche explain.

Both the top and monolithic central column are crafted from steel sheets using spin forming technology. The table is available in three different finishes obtained

by polyester powder coating with colours that recall the metallic nature of the piece and enhance the material's beauty.

Its dimensions (130 cm diameter, 75 cm height) make it ideal for a wide range of uses, both in residential and contract settings.
