

Animal Factory miniature

design **Luca Boscardin** / 2026

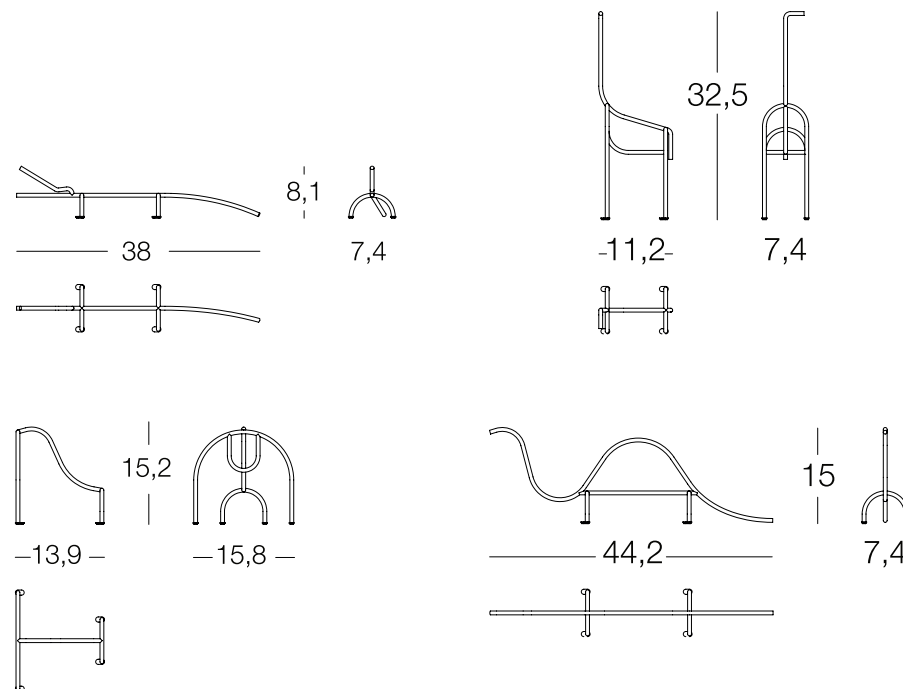

The giraffe, crocodile, gorilla and dinosaur (Animal Factory) have been scaled down to 1:10 and are made of glossy, painted steel rods.

Animal Factory miniature is not just a scale reduction, but an expansion of perspective. It is a small universe in which dreams and creativity take shape.

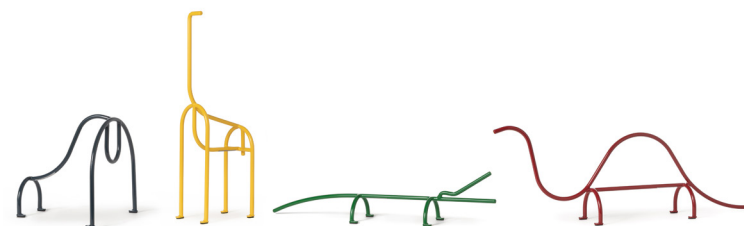

The collection invites us to slow down, get closer and rediscover the wonder in the details and narrative power of simple forms. It is a collection that straddles the boundary between art and design, play and contemplation, and restores creative play to its purest form — bringing an entire world to life within a few centimetres.

material /

Steel rod painted in polyester powder, glossy finish.

colours /

Gorilla blue
