

Hopy

design **Alessandro Stabile** / 2026

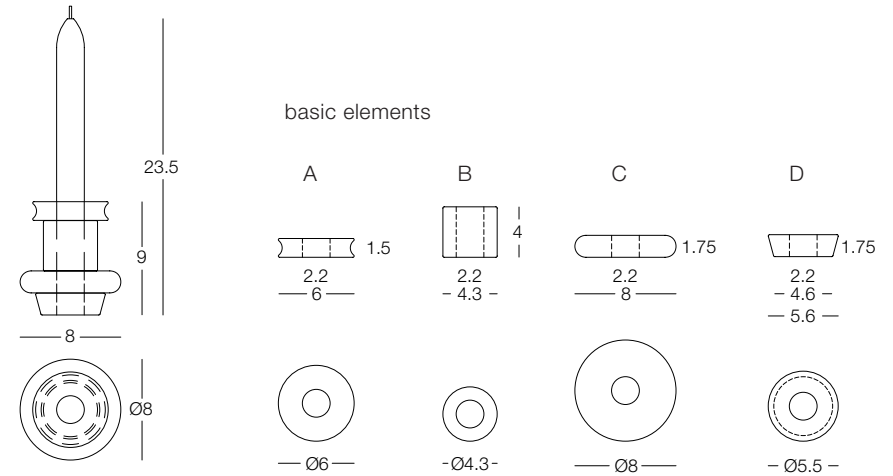

The Hopy candle holder, designed by Alessandro Stabile, is born from a simple gesture: stacking.

Four concrete rings with a graphic, material-driven style, different colours and shapes that swap places at will, forming up to 48 combinations.

No combination is ever final — it's a playful object that never tires: it comes together, falls apart, comes together again, expressing a unique and essential character each time.

material /

Concrete. Composed of 4 interchangeable elements. Suitable for candles Ø22 mm. Candle included.

colours /

examples of composition

brick orange (element A)
blush (element B)
light green (element C)
ochre yellow (element D)
