

## PRESS RELEASE

# Mariolina stool

design **Enzo Mari**

We are pleased to announce that the Mariolina stool is now available. Lightweight and stackable, this new addition expands one of Magis' most iconic seating families, making it even more versatile and functional.

When designing Mariolina in the early 2000s, Enzo Mari approached the chair as an archetype, driven by the desire to create an object that was "as simple as possible, almost obvious". In contrast to the overly decorative and technologically exaggerated language of the time, Mari envisioned a chair defined by clarity, intelligence and authenticity.

Inspired by the lightness of 1950s seating, Mariolina combines apparent simplicity with meticulous attention to detail. From the slim steel tube frame to the moulded ribs that seamlessly connect the polypropylene seat and backrest to the structure, every element reflects Mari's rigorous and thoughtful design approach.

With the introduction of the stool — which shares the same forms, features and materials as the chair — the collection naturally evolves into new settings and functions, while preserving the same balance between simplicity, practicality and personality.

Available in the same finishes as the chair and in two different heights, 66 and 76 cm, the Mariolina stool is suitable for both residential and contract spaces, offering comfort thanks to its generously proportioned backrest.
